# REPORT OF THE ACTIVITIES OF CHEMISTRY ASSOCIATION

## *METALLICA 2017-18*

As an effort to highlight the inner determination to go forward despite the challenges and create self-affirmation in our students, association activities are started. Each department has its own association. The association plays a key role in conducting seminars, workshops, intercollegiate competitions and other department level functions. The students are also guided to participate in various activities to develop their scientific and technical skills in various aspects. The science of chemistry is fundamental to the understanding of the world and cosmos. The real importance of chemistry is that it serves as the interface to practically all of other sciences as well as the many other areas of human endeavor. An executive committee was selected which comprised two members from each class. Sidharth Mohan and Aiswarya Mohan of D<sub>3</sub>Chemistry were selected as the Association Secretaries. Dr. Jalaja J. Malayan was nominated as the teacher in charge of the Chemistry Association.

# SPECORD-2018 REGIONAL SEMINAR ON

## FTIR, NMR SPECTROSCOPY AND COORDINATION CHEMISTRY

20<sup>TH</sup>, 21<sup>ST</sup> March-2018

Venue: Mrs. MAMMEN MAPPILAI HALL

Organised by

POST GRADUATE DEPARTMENT OF CHEMISTRY  
Baselius College, Kottayam-686001

Dear Sir/Madam,

Coordination Complexes have been known since the beginning of modern Chemistry and spectroscopic studies can be used to detect, identify and quantify information about the atoms and molecules. We the department of chemistry is organising a regional seminar on FTIR, NMR spectroscopy and coordination chemistry on 20th, 21st March 2018.

The seminar aims at updating the scientific and academic communities with the current advancement in different areas of chemistry and will provide a platform for interaction and exchange of ideas. Molecular spectroscopy finds application in determining the structure of molecules and study of intermolecular interactions. The great structural diversity of inorganic compounds make them important in industrial feeds stock, fine chemicals, catalyst and advanced materials. Spectroscopic aspects of coordination complexes can be studied using its symmetry properties.

We earnestly solicit your whole hearted participation for the success of the programme.
