VALUE EDUCATION REPORT

Value education is the process by which people give moral values to each other. Value education is the aggregate of all the process by means of which a person develops abilities and other form of behavior of the positive values in the society in which he lives'. Some use the concept values education as an umbrella of concepts that includes moral education and citizenship education. Themes that values education can address to varying degrees are character, moral development, Religious Education, Spiritual development, citizenship education, personal development, social development and cultural development. So the value education is "learning about self and wisdom of life" in a self exploratory, systematic and scientific way through formal education.
